LINK-UP BOILER SYSTEMS

FOR MAXIMUM EFFICIENCY, FLEXIBILITY AND ECONOMY

The "C" Type Neutralizer

The "C" type Neutralizer is designed for installation below the hot water cylinder, and can be supplied with additional connections and capacity. This model can also be used for systems with two or more boilers. (Refer to installation instructions).

The "C" type is 450mm diameter and 166mm high. The standard Neutralizer has nine 28mm connections.

THE TROUBLE FREE METHOD OF INTERLINKING TWO OR MORE BOILERS

The "C" Type Neutralizer with built on cylinder stand

Designed for ease of installation with removable top access to make vent pipe connection. Saves building a platform or using timber to rest the cylinder on.

PATENT NUMBER GB2521010B

The "C" type with stand is 450mm diameter and 280mm high.

The "R" Type Neutralizer

The "R" type Neutralizer is designed for wall mounting, adjacent to the hot water cylinder. The shape facilitates the fitting of neat pipework.

The "R" type is 200mm high, 150mm wide and 220mm long.

The "R" type Neutralizer is ideal for linking with our range of multifuel stoves www.dunsleyheat.co.uk
